

Position Overview

The MIC Group Maintenance Technician is responsible for keeping the equipment and machinery in optimal condition. Meeting the Preventive Maintenance Plan and reducing the time machines are down, due to maintenance failures, is the ultimate objective. A high sense of urgency to solve problems and make decisions is critical. Working with production planning to schedule maintenance, with little to no interruption of production, is vital. Keeps in constant contact with Buyers, and if needed, directly contacting outside vendors for service.

Key objectives for this role:

- Support production requirements to maintain customer on-time delivery
- Actively participate and support the plant's safety program and report any injury or near miss immediately to a Supervisor or EHS Manager. Report all unsafe conditions immediately to a Supervisor, Manager or EHS Manager.

Job Duties and Responsibilities:

- Reassemble machines after the completion of repair or maintenance work
- Start machines and observe mechanical operation to determine efficiency and to detect problems
- Inspect or test damaged machine parts, and mark defective areas or advise supervisors of repair needs
- Lubricate or apply adhesives or other materials to machines, machine parts, or other equipment, according to specified procedures
- Install, replace, or change machine parts and attachments, according to production specifications
- Dismantle machines and remove parts for repair, using hand tools, chain falls, jacks, cranes, or hoists
- Record production, repair, and machine maintenance information
- Read work orders and specifications to determine machines and equipment requiring repair or maintenance
- Set up and operate machines, and adjust controls to regulate operations
- Collaborate with other team members to repair or move machines, machine parts, or equipment
- Inventory and requisition machine parts, equipment, and other supplies so that stock can be maintained and replenished
- Transport machine parts, tools, equipment, and other material between work areas and storage, using cranes, hoists, or dollies
- Collect and discard worn machine parts and other refuse in order to maintain machinery and work areas
- Clean machines and machine parts, using cleaning solvents, cloths, air guns, hoses, vacuums, or other equipment
- Replace or repair metal, wood, leather, glass, or other lining in machines, or in equipment compartments or containers
- Remove hardened material from machines or machine parts, using abrasives, power and hand tools, or other equipment
- Measure, mix, prepare, and test chemical solutions used to clean or repair machinery and equipment
- Replace, empty, or replenish machine and equipment containers such as chemical tanks or boxes
- Maintain a safe, clean, and orderly work area. Keep all walkways and aisle free of any debris or clutter. Maintain 5S standards by returning tools to proper place
- Daily attendance is a requirement of the job, as is arriving on time. Overtime is expected when customer demand dictates the need
- Other duties as assigned

Requirements:

- Knowledge and experience with:
 - PLC, CNC, Hydraulics, computer skills, PM, TPM, Machine tools, Electronics, Drives
- 5-10 years' experience
