

Summary

In addition to a part or assembly being manufactured, many of our customers need some level of functional or physical testing. We are able to provide both pressure testing and non-destructive testing on site. Both have fully trained personnel to address these specific processes to ensure all the testing parameters are met and are able to provide fully certified results as well.

Pressure Testing Specifications

External Testing	20K PSI @ Ambient Temp	10" OD x 4'
External Testing	30K PSI @ Ambient Temp	7" OD x 5'
Internal Testing w/ Custom Fittings	20K PSI @ Ambient Temp	7" OD x 5'

NDT Specifications

LPI	Level 2
